WHY SPECIALIZED PROGRAMS?

Separation and divorce are family transitions that challenge children and parents. Moving forward involves dealing with grief, anger, disappointment, and fear. Learning about the process of divorce helps parents reduce conflict, provides a foundation for building parenting partnerships, and creates an opportunity to strengthen relationships with children. Blending families and remarriage requires children and parents to build new relationships, define roles and boundaries, establish parenting styles and discipline strategies, and develop stepfamily routines and traditions.

Our seminars and groups bring together individuals with similar experiences. Listening, learning and sharing ideas with others provides children and parents with support in a safe and confidential setting. The professional leadership of our programs offers participants up-to-date information and practical skills for coping with the challenges of transition. Parents learn ways of supporting their child's adjustment to the changing family circumstances.

FIT staff are trained as social workers or therapists. They have post-graduate education at the Master's or Doctoral level. In addition to experience in working with changing families, the staff have training in child development, grief work, and conflict resolution. FIT programs and research have an international reputation.
